

calendar

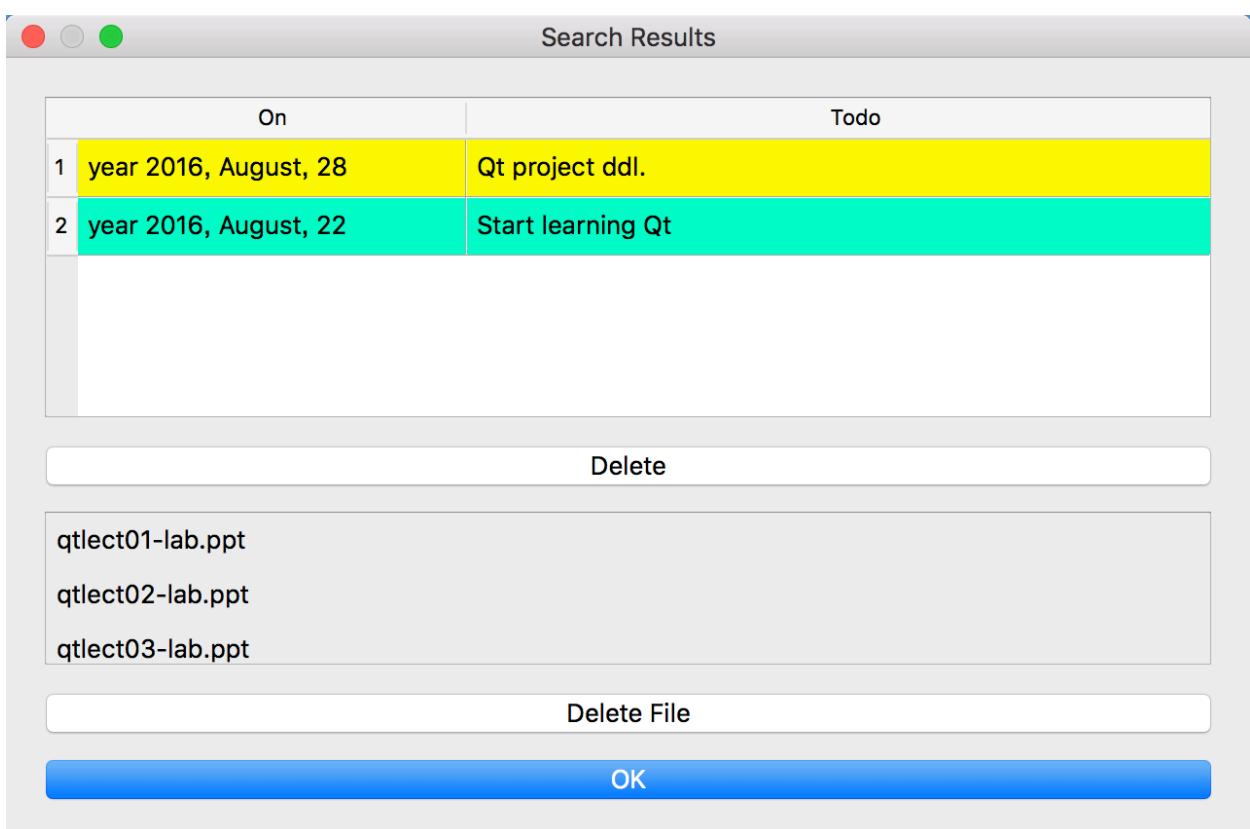

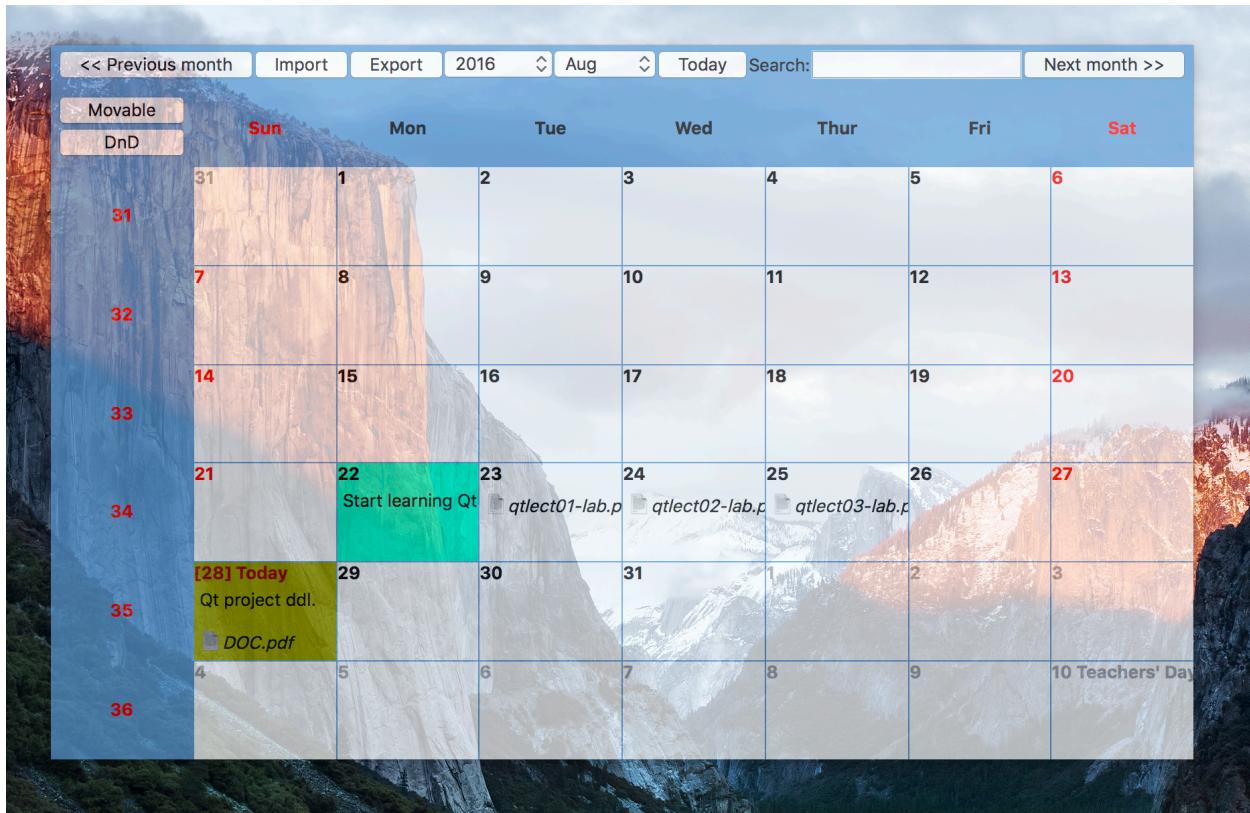

Qt Huge Project

A simple well-designed desktop calendar for Windows, Linux and OS X.

Features

- Remind you what to do.
- Save your daily files using Drag and Drop technology.
- Export and import your to-do lists to help you share your idea with others.
- Search your to-do lists and files.
- Use SQLite database with journal to protect your data.
- Open Source, so you can do whatever you want.

Building

1. Run `lrelease calendar.pro`
 2. Run `qmake`
 3. Run `make`
